SUMMARY

Software engineering professional with 2+ years of experience in REST APIs, backend, and frontend development. Maintained and continuously developed a high-traffic, scalable system serving 300K+ DAUs by leveraging microservices.

TECHNICAL SKILLS

Languages & Databases: Python, Java, React, Javascript, Typescript, SQL, MySQL, PostgreSQL
Cloud & DevOps: AWS (S3, SES, Lambda, EC2), Docker, Kubernetes, Jenkins, Git
Frameworks & Tools: Spring Boot, FastAPI, Flask, REST API, GraphQL, Visual Studio

EXPERIENCE

Winston Lab of Social Science and Innovation Feb 2025 - Present
Software Engineer Los Angeles, CA

- Served as the first frontend engineer, collaborating with designers and backend developers, and occasionally contributing to backend development using React, Spring Boot, Java, Python, FastAPI.
- Developed an Learning Management System (LMS) integrated with an educational AI agent using LangChain, Llama-Index, and OpenAI to help students and instructors manage and resolve queries.
- Mentored and facilitated the onboarding of two interns by providing technical documentation, conducting regular one-on-one meetings and code reviews, and offering actionable feedback to support their growth.

USC Information Sciences Institute Jun 2023 - May 2024
Machine Learning Engineer Los Angeles, CA

- Enhanced computation-efficient LLM inference (OPT, v1BERT) using the SNIP pruning and model sharding for distributed execution, reducing inference time by 20% using Python, PyTorch, Tensorflow, and Huggingface.

LG CNS Jan 2019 - Feb 2021
Software Engineer Seoul, Korea

- Delivered a starter kit with frontend templates and backend integration to help developers quickly ramp up on new projects, reducing setup time by 70% for 1,000+ developers by leveraging Spring Boot, Java, and Scrum methodology.
- Led and built an integrated API system connecting mobile data plans with external partners like Netflix and Kia Motors, serving 80K+ users and generating over \$20M in revenue, using REST APIs, Microservices, and Agile Development.
- Maintained and developed a mobile service system with 300K+ DAUs, implemented monitoring systems, and troubleshooted real-time issues. Also oversaw weekly task distribution for 8 developers in a system operator role.

PROJECTS

Online marketplace ([demo](#)) (Docker, React, Typescript, Go, GraphQL, FastAPI, Open AI, PostgreSQL) Jan 2025

- A web app for buying and selling items, featuring image recognition to auto-generate item specs and streamline listings.

Books Review Diary ([demo](#)) (AWS, Docker, Nodejs, Javascript, CSS, MongoDB) May 2024

- A serverless full-stack app on AWS for book search, saving, reviews, and personalized recommendations.

EDUCATION

University of Southern California, Los Angeles, CA Dec 2024
MS in Electrical & Computer Engineering - Machine Learning & Data Science (GPA: 4.0/4.0, MS Honors)

Hanyang University, Seoul, Korea Dec 2018
B.S., Electronic Engineering (GPA: 93/100, First prize for senior team project)
